AUTOMATIC BAGGING MACHINE
MODEL 3CM-5FG

SUITABLE FOR FOOD POWDERY PRODUCTS.

Model 3CM-5FG is gross weighing and bag lifting type-bagging machine with vertical auger feeder filling products to bottom of bags. Bag lifting up and down system prevents trapped air in products and powdery dispersion, minimizing products fall distance. It achieves high accuracy of weighing for powdery products and prevents dust generation at least level.

Auger screw with vacuum air inhler can fill products to bags, decreasing bulk density. It can be disassembled and cleaned easily suitable for food products. The machine has the alternatives for air evacuation of vacuum air inhler or additional weighing at the secondary section. Air ridding system makes bags of good shape for palletizing.
