

NP-8

PORTABLE DOUBLE-THREAD BAG CLOSER

The Newlong NP-8 portable bag closer is a high-speed, double-thread industrial sewing machine engineered for secure closure of heavy jute and hessian bags. Designed for demanding agricultural and industrial packaging environments, the NP-8 delivers strong double-thread chain stitching at speeds up to 1,600 rpm, ensuring tight, reliable seams on filled bags. Its shock-resistant isolation handle improves operator comfort and control, while the automatic oil-pump lubrication system protects internal components for long service life and minimal maintenance.

With an 8.5 mm fixed stitch length, DNx1 #25 needle system, and automatic thread cutter, the NP-8 provides consistent, professional bag sealing performance across bulk commodities such as grain, fibers, minerals, and other heavy materials. Trusted worldwide and supported by American-Newlong's parts, service, and technical expertise, the NP-8 is the preferred portable solution for double-thread bag closing where strength and durability are critical.

SPEED	1,500 ± 100 r.p.m (6-7 seconds/bag)
STITCH LENGTH	8.5 mm (fixed) / 3.5 stitches per inch
NEEDLE	DNx1 #25
CUTTER	Automatic Thread Cutter
BAG MATERIAL	Hessian, Jute
OILING SYSTEM	Oil pump lubrication
