

# DS-9C | STATIONARY SEWING HEAD

## INFORMATION ON THE DS-9C

The Newlong DS-9C is the fastest single-needle bag closing machine on the market, designed to handle virtually any type of filled bag with maximum speed and precision. Unlike competing models, the DS-9C was specifically designed for high-speed, heavy-duty industrial automation lines, ensuring reliable performance.

Its balanced rotating parts reduce vibration and ensure a smooth, consistent, and secure closure, even on conveyor belts exceeding 80 FPM.

Featuring a unique, fully enclosed oil bath lubrication system, the DS-9C extends component life, improves reliability, and reduces maintenance. Additionally, a pneumatic guillotine cutter automatically cuts thread and/or crepe ribbon, reducing waste and achieving a uniform, professional finish.

<b>SPEED</b>	2,700 r.p.m.
<b>STITCH LENGTH</b>	10 mm (standard setting) / 7-10.5mm range
<b>NEEDLE</b>	DR-H30 #26
<b>CUTTER</b>	Air Cylinder Operated (3.5 NI/min, 4kg/cm <sup>2</sup> )
<b>MATERIAL THICKNESS</b>	8 mm maximum
<b>OILING SYSTEM</b>	Maintenance-free automatic oil bath system
