

NP-3II | PORTABLE DOUBLE-THREAD BAG CLOSER

The Newlong NP-3II Portable Bag Closer is a durable industrial sewing machine engineered for high-strength double-thread chain-stitch closures on filled bags in agriculture, chemicals, construction materials, and industrial packaging. Using a single needle and looper, it produces a two-thread chain stitch that creates tighter, more durable seams than single-thread models, making it well-suited for heavy bags or products subject to rough handling during transport.

The NP-3II features a straightforward design with manual oiling and a moderate sewing speed, making it a reliable option for operations that value durability, seam strength, and low maintenance over maximum speed. Its double-thread chain stitch ensures strong seam integrity for thicker materials, including geotextiles, woven polypropylene, jute, and multi-wall kraft paper bags.

Operating at approximately 1,350 r.p.m., the NP-3II combines portability with strong bag-closure performance. Key features include automatic thread cutting, robust steel cam construction, and compatibility with kraft paper, cotton, jute, woven polypropylene, and geotextile materials.

SPEED	1,350 ± 150 r.p.m
STITCH LENGTH	8.5 mm (fixed) / 3.5 stitches per inch
NEEDLE	DNx1 #25
CUTTER	Automatic Thread Cutter
BAG MATERIAL	Kraft Paper, Cotton, Hessian, Jute, PP/PE woven cloth and more
OILING SYSTEM	Oil pump lubrication
